

Refactor the app StarWars to the structure shown in the next page

Create 3 ng-modules:

- `app-routing.module.ts`
- `movies.module.ts`
- `movies-routing.module.ts`

```
//angular modules
import { NgModule } from '@angular/core';
import { RouterModule } from '@angular/router';

//Components
import { MoviesListComponent } from './components/movies-list/movies-list.component';

@NgModule({
  imports: [
    RouterModule.forChild([
      { path: 'movies', component: MoviesListComponent }
    ])
  ],
  exports: [
    RouterModule
  ]
})
export class MoviesRoutingModule { }
```
