

Use npm start in servidor_canciones

Use this rest service to code a CRUD app of songs

```
← → ↻ ⓘ localhost:3000/canciones  
[{"id":1,"nombre":"Cancion 1","duracion":350,"fechaAlta":"2017-10-21"},  
{"id":2,"nombre":"Cancion 2","duracion":260,"fechaAlta":"2017-10-22"},  
{"id":3,"nombre":"Cancion 3","duracion":280,"fechaAlta":"2017-10-23"}]
```

```
← → ↻ ⓘ localhost:3000/canciones/2  
{"id":2,"nombre":"Cancion 2","duracion":260,"fechaAlta":"2017-10-22"}
```

Use POST to create a new song

Use PUT to edit a new song

Use DELETE to delete a song

New song -> id must be provided

Edit song -> id must be shown, not editable by user

You can see code samples of POST, PUT, DELETE http methods in
Angular Heros tutorial
